

FILLING NEEDS.

**We understand the
challenges hospital
pharmacies face today.**

With revised HIPPA and JCAHO standards, hospitals today need to comply with a long list of criteria and be in a constant state of "readiness." Having access to pharmacy services 24/7 is crucial to stay in compliance and meet patient needs.

Maintaining an on-site graveyard staff in order to provide 24/7 pharmacy coverage can be costly and time-consuming for many small to mid-sized hospitals. Fortunately, there is an easier, dependable, more cost-effective solution that's available to you at all times – *e-PharmPro Inc!*

We put our staff of state licensed pharmacists within reach of your on-site staff with just the touch of a button or the click of a mouse. Your on-site staff can tap into our seamless, around-the-clock remote order entry and prescription verification services whenever the need arises. So you can stay in compliance and fill patient needs, safely and reliably. All for a fraction of the annual cost to staff an on-site graveyard shift.

See how *e-PharmPro* works to fill needs, meet standards and reduce costs for hospitals like yours with ...

- Remote Pharmacy Clinical Services
- Remote Order Entry
- Remote Prescription Verification
- Video Verification of Dispensed Medications

WHO WE ARE

Established in 2002 by Founder and Owner, Mark G. Steltz RPh., MBA, *e-PharmPro* is your seamless, virtual order entry and prescription verification resource, ready whenever you need us!

OUR MISSION is to provide support to hospital pharmacies, promoting the profession of pharmacy as a gatekeeper in the prevention of medication errors and enhancing the efficiency of other healthcare professionals.

OUR STRENGTH lies in our customized remote pharmacy solutions, designed to meet each institution's unique needs.

OUR STAFF consists of more than 3,200 state licensed pharmacists, representing nearly 200 disciplines. We'll create a team of pharmacists with the right expertise to match your hospital's areas of clinical specialty.

WHAT WE DO

The *e-PharmPro* solution offers your hospital flexible, economic and reliable remote prescription verification, remote

order entry, remote clinical services and video verification of dispensed medications as needed. Our prescription queuing system assures the tracking of all orders for patient safety and order processing efficiency.

TURNKEY OPERATION

Unlike many telemedicine services that require the purchase and installation of expensive hardware and proprietary software, as well as time-intensive training, *e-PharmPro* allows you to "use what you have" to enhance your pharmacy's capabilities and services. We link our secure, Web-based services to your existing IT resources. This requires little or no increase in your institution's IT costs.

SEAMLESS SERVICE

Phone calls and orders are delivered to *e-PharmPro* in the same fashion as they are when your regular on-site pharmacy is open. Calls and faxes are transferred directly to a dedicated *e-PharmPro* line, in real time, using your existing internal phone and fax numbers. Your nursing staff will be able to immediately reach and speak to a live pharmacist. With a system capable of serving over 100,000 users, you won't have to worry about busy signals.

A QUEUING SYSTEM YOU CAN COUNT ON

e-PharmPro uses a quality queuing system that time stamps all orders and tracks all orders that are filled. This system is designed to assure data integrity, security and safety at all times.

MEETING STANDARDS.

All aspects of *e-PharmPro* remote access pharmacy service are HIPPA compliant and satisfy JCAHO standards.

e-PharmPro is surprising affordable, compared to the annual cost to staff a graveyard shift.

USING *e-PharmPro* IS COST-EFFECTIVE!

Your hospital and its patients can enjoy the many benefits, service and security of *e-PharmPro* at affordable rates. We'll work with you to assess your needs and set up a weekly charge, based upon an agreed service level. Your hospital only pays for the portion of the pharmacy services that are actually used – another way we help you contain costs.
